Computer Science 3 – 1st Quarter Project Proposal

Title: ElemenTable

Description:

It is a website about the elements of the periodic table. Each element has its own content page in which the description of the element (e.g., density, atomic number) is written in. The user can select on the elements page where which element the user wants to know more.

Outline:

Outline	Description
	Homepage This is the main homepage. It has two links; Elements (links to Element Page) and to an about page.
	Elements It contains the Periodic table of elements that links to specific element pages (elements will be clickable later). It also has top bar that contains the website name and links to home, elements, and about pages
	About Will contain the information about the page. It also has the top bar that contains the same things as the Elements Page.

	Page 1 The page that will contain the description of an element. It also has the top bar that contains the same things as the Elements Page.
	Page 2 Another page that will contain the description of an element. It also has the top bar that contains the same things as the Elements Page.
